

INES SUMMMER SCHOOL

12-05-2025

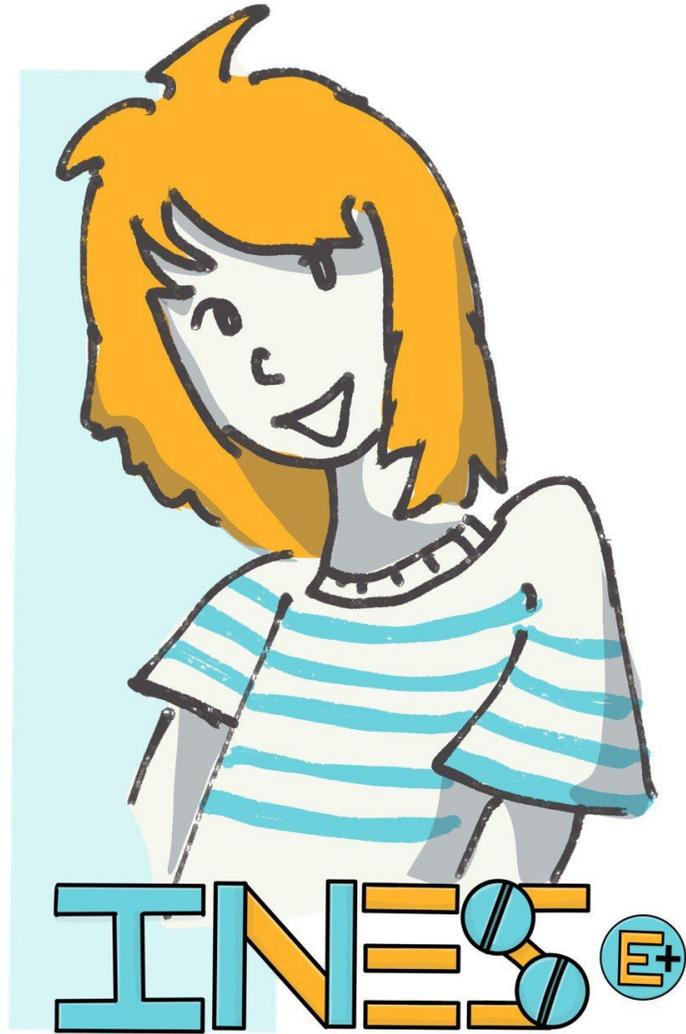

Co-funded by the
Erasmus+ Programme
of the European Union

Luca Ferrari
Antonio Leone

Blended Intensive Programs (BIPs) are short-term Transnational Intensive Programs of Study, characterized by an activity that must be done in-person, lasting from 5 days to 1 month (which will be done in mobility abroad), and an activity that must be done online.

INES BIP/SUMMER > 3 ECTS credits

The INES Summer School (second edition) is the practical translation of a funded Blended Intensive Programme (BIP) "Innovative teaching and learning paths for the prevention of new drugs abuse" coordinated by the Department of Education Studies, University of Bologna.

<https://ines.unibo.it/>

One main objective of the INES project was to integrate the topic of new psychoactive substances (NPS) into the mainstream school curriculum through close collaboration with schools and universities. Rather than treating this important subject as marginal or episodic, we created an interdisciplinary pathway that actively involves students and teachers in co constructing the curricular proposal

> the importance of the school's leading role within a system of continuous school-university-territory collaboration, capable of activating innovation and transformation, making all involved actors active agents of change!

SUMMER SCHOOL PARTNERSHIP

University of Transylvania (Romania),

University of Porto (Portugal),

Charles University in Prague (Czech Republic),

University of Malaga (Spain),

University of Bologna (Italy – coordinator)

SURNAME	NAME	PARTNER UNIVERSITY

MAZZÀ	MATTEO	University of Bologna (extra)

Aim of the Summer School: to enhance, disseminate, and expand some of the results of the INES project by involving a different target group than the one envisaged.

University students, in this course, after an initial period of autonomous training, will have the opportunity to participate and collaboratively create Open Educational Resources (videos, infographics, interactive presentations, podcasts, tests etc.) on the following topics.

- Classification and categorization of New Psychoactive Substances;
- Toxic effects and Risk assessment;
- Diffusion Channels;
- Representation of NPS use in mainstream channels.

The overall objective of the Summer is to foster exchange and collaboration among students from different university backgrounds through the study/depth of the NPS topic from an interdisciplinary perspective

your goal is to create, in group, different interactive resources, aimed at **secondary school students**, take in account the topic assigned

After the online seminar and the individual/group study

- 1 poster (a graphic representation) on the assigned topic created with Canva;
- 1 short video / or 1 podcast (max three minutes long) simulating a video lecture (created with the power point record tool or other software you know) in english;
- 1 interactive game using Genially software;
- 5 multiple choice questions on the assigned topic (to be shared by word docs)

Everyone must participate! Groups will be monitored by tutor Antonio Leone

MANDATORY ACTIVITY FROM MAY TO JUNE 2024

- **individual learning (all modules):** take inspiration through the materials created in the past edition (Winter School), consult the Syllabus (ALL THE TOPIC), study the book chapter related to the topic assigned in your group.
- **individual learning:** online seminar
- **group activity:** by the 30 of june -> creating and sharing the Digital Resources which will be present and evaluate during the last day of the physical mobility (July 4)

Next online seminars (virtual mobility)

Luca Ferrari (+ tutor)	Summer organization INES & Open Educational Resources in the field of NPS	12 May 16:00 (CET)
Laura Mercolini, Roberto Mandrioli, Michele Protti	NPS CLASSIFICATION	20 May (9:00 am CET, 10:00 am CEST) online
Fernando Remião and Bárbara Silva (Prof)	Principles of toxicokinetics and toxicodynamics applied to NPS	21 May (online): 10:00 (Porto time); 11:00 (Bologna time)
Dana Perniu, Maria Covei, Cristina Bogatu, Camelia Draghici, Maria Elena Cocuz, Cristina Salca-Rotaru	Diffusion channels	23 May (online): 17:00 (Romania time); 16:00 (Bologna time)
Přemysl Mladěnka (Prof)	NATURAL AND SYNTHETIC ILLICIT DRUGS INTERFERING WITH ADRENERGIC RECEPTORS: THEIR CARDIOVASCULAR TOXICITY	June 5 online 16:00 (CET)

Group organization
